EDUCATION

Bachelor of Technology (B.Tech.) in Computer Science
Christ College of Engineering, Irinjalakuda

CGPA: 8.73 — 2019 - 2023
Kerala, IN

SKILLS

Programming	Java, Dart, C/C++, MySQL, Python, Git, Hibernate/JPA, Arduino.
Development	Springboot, Flutter, AWS, Selenium, Postman, openCV, spaCy, Java Swing/AWT, Tkinter.
Technologies	REST APIs, Containerisation (Docker, K8s), Eureka, Microservices, Firebase, Unix, Swagger.

EXPERIENCE

Software Developer Intern

Feb 2023 - Apr 2023

- Baton Systems (India Pvt. Ltd.), Chennai, IN

(**Spring Boot, MySQL, AWS**) — [certificate](#)

- **Developed, dockerised & deployed** a micro-service based banking application using Spring Boot.
- Redesigned the app to include **email-service** feature using **SMTP** protocol and tested them using **Selenium**.
- Used **K8s clusters** to route requests, balance load across servers and for reduced down time.

Data Analyst Intern

Oct 2022 - Feb 2023

- Ernst & Young (EY GDS India LLP), Kochi, IN

(**Python, Docker, ML**) — [certificate](#)

- Developed an in-house Python script for logistics team using **simulated annealing** and **metaheuristics**.
- Used a **Fleet Optimization Model** to maximize productivity and reduce cost.

Flutter Developer Intern

Apr 2022 - Jun 2022

- Agriday, Remote

(**Flutter, Firebase, Testing**) — [certificate](#)

- Developed and integrated **REST APIs** to android along with interacting and testing them using **Postman**.
- Reduced the latency between one-to-one and group chats by **25%** with **Firebase RTDB** (Real Time Database).

PROJECTS

SwiftPay

(**Spring Boot, Docker, AWS**) — [GitHub](#)

- Implemented the **SWIFT** international messaging system for updating balances in reponce to SWIFT messages.
- Used a tunnelled **Eureka** server port to monitor loosely coupled microservices from the AWS **EC2 instance**.

TraWell App

(**Flutter, Spring Boot, TensorFlow**) — [GitHub](#)

- Trained an optimized **TFLite** Model compatible for android using **CNN** Algorithm to detect monuments.
- Used Yandex API to build a **TTS** (Text to Speech) Engine which aided in **voice-to-voice** translation.

ACHIEVEMENTS & LEADERSHIP

- **Winner** - Hac'KP (**Intl. Hackathon** 2021) - developed a **dark web** monitoring software. ([grapnel](#))
- **Winner** - Hack@Arch (Natl. level **36hr Hackathon** 2022) - developed an **AI** powered travel app. ([trawell](#))
- **Winner** - RIBC (Natl. level **36hr Hackathon** 2022) - developed a **decentralised** cab booking app. ([lyft](#))
- **Winner** - EY WhyHack 2022 (**24hr Hackathon** 2022) - developed a **pothole detection** framework. ([pot](#))
- **150+** Followers, **76+** Stars, **56+** Repos [in GitHub] • **3 Star** CodeChef • **250+** Coding questions solved.
- **CEO** - Entrepreneurship Development Centre: Led **emerging tech** to aid innovators in their prototyping stage.
- **GDSC Lead** - Mentored 500+ SDE aspirants in the field of cross-platform app development using **Flutter**.
