SKILLS

Programming: Java, C++, Python, Flutter, MySQL, DSA, JPA/Hibernate, Git, TDD
Backend & Cloud: Spring Boot, Microservices, AWS, Apache Camel, ActiveMQ, OAuth2, JWT
Development: Docker, K8s, CI/CD, REST API, Postman, Selenium, Automation, Unix, Maven, JUnit

EXPERIENCE

Software Engineer 2 Aug 2023 - Present
Baton-Ubixi Systems, Chennai, IN (Java/Spring Boot, MySQL, SFTP, Automation)

- Developed a **JavaScript** automation tool for data ingestion into MySQL DB, this reduced setup time by **95% (5 days to 5 hours)**, improving deployment efficiency and scalability.
- Revamped an XML-based SFTP service into a database-driven approach, enabling dynamic route management in **Apache Camel** without requiring service restarts.
- Designed a custom **SFTP health check** linked with **PagerDuty**, this automated fault detection, cutting manual intervention by **30%** while optimizing performance.
- Developed a cloud-native low code integration tool based on **Camel Karavan** and **AtlasMap** which supports ETL, enabling quick workflow development even by non-technical users.
- Implemented **Python** automation to eliminate redundant configuration code across multiple microservices, resulting in accelerated client on-boarding and improved efficiency.
- **Automated** execution of MySQL queries from PDFs parsed in Java, boosting operational efficiency by **20%**.
- Created **Python** scripts for automated **tag/commit diff** generation, streamlining release documentation.

Software Engineer Intern Oct 2022 - Feb 2023
Ernst & Young (EY), Kochi, IN (Python, Docker, NLP, ML)—[certificate](#)

- Developed a **Python** model using **simulated annealing** and **meta-heuristics** for logistics optimization.
- Used a **fleet optimization model** to maximize productivity and reduce costs at varying pick and drop points.

ACHIEVEMENTS & LEADERSHIP

- **Winner** - Hac'KP - Kerala Police (**Intl. Hackathon 2021**) - **dark web** monitoring software. ([grapnel](#))
- **Winner** - Hack@Arch (**National Level 36hr Hackathon 2022**) - **AI** powered travel app. ([trawell](#))
- **Winner** - RIBC (**National Level 36hr Hackathon 2022**) - **decentralised** cab booking app. ([lyft](#))
- **Winner** - EY WhyHack 2022 (**Natl. Level 24hr Hackathon 2022**) - **pothole detection** framework. ([pot](#))
- **65+** Projects, **115+** Stars [in **GitHub**] • Speaker at Kochi FOSS 2025 (**Selenium** automation).

EDUCATION

Bachelor of Technology (B.Tech.) in Computer Science CGPA: **8.7** — 2019 - 2023
Christ College of Engineering *Irinjalakuda, Kerala, IN*
Higher Secondary, XII, Science: Jawahar Navodaya Vidyalaya, Thrissur CGPA: **8.92** — 2018 - 2019

PROJECTS

SwiftPay (Banking Software) (Spring Boot, Docker, AWS)—[GitHub](#)

- Built a **SWIFT**-compatible banking system handling **1000 TPS**, optimizing transaction speed & security.
- Enhanced the software by optimizing concurrency and multi-threading capabilities using **ExecutorService**.

TraWell App (AI travel guide) (Flutter, Spring Boot, TensorFlow)—[GitHub](#)

- Trained an optimized **TFLite** model compatible with Android using **CNN** Algorithm to detect monuments.
- Integrated Yandex TTS (text-to-speech), enabling real-time multi-language voice translation for travelers.
